

Australian Made Tank Mounted Electric Air Compressors

2.25hp – 10hp

Australian Made Air Compressor with Australian Manufactured Compressed Air Receiver to AS1210 Standards

2 Years Warranty

All valves and fittings are forged brass for longevity

Full range of spares & service available

Heavy-Duty Cast-Iron Pump to ensure 100% duty cycle if required

Only copper piping used ensure longevity of all connections

DESCRIPTION

Covering from 8.5cfm to 36.7cfm, Our Australian Manufactured Electric Piston Compressor range guarantees market leading reliability, efficiency and durability. With models in both single phase and three phase, only the most heavy duty and tested components are utilized.

The Focus Australian Made Piston Compressors utilize a Cast-Iron Pump instead of the common aluminium pumps to ensure the compressors can operate at 100% duty cycle if required. More cost effective than the screw compressor range, the Australian made piston compressor range is ideal for smaller operations or where a portable but reliable source of compressed air is required.

MODEL	MOTOR POWER		PRESSURE		FLOW RATE FAD		Tank Size	POWER	DIMENSIONS	WEIGHT
SB	kW	Hp	Bar	Psi	l/min	C.F.M	L	V/H/PH	L x W x H (mm)	Kg
